# Alberta Health Services Installation of a First DICE™ Dosing Module

## DICE™

Alberta Health services installed their first DICE™ dosing module in one of their hospitals in May 2019. The chemical feed system adds sodium hydroxide to the hospital boiler system.

### Application

- Sodium hydroxide dosing
- EPDM Seals and Diaphragm
- 1/2" module
- Acrylic block
- PVC components

---

### Jim Wright - Plant Manager

#### Safety

“Working with chemicals has always implied important health and safety concerns, especially when chemicals are pressurised. Meunier Technologies offered us a simple and reliable solution to minimize those risks by integrating a necessary safety relief feature to our Sodium Hydroxide dosing system. As manager and being responsible for the health and safety of my employees, I can now say DICE™ has provided me peace of mind of knowing my employees now work in a safer environment.”

#### Simplicity & Installation

“Selecting, ordering and installing the DICE™ has been a simple, pain free quick process for us. With minimal requirements (no design, no specific expertise and no tools) retrofitting the DICE™ dosing module was truly a real plug and play experience.”
