 MEUNIER
TECHNOLOGIES™

Collaboration between Veolia Water Technologies Canada inc. and Meunier Technologies inc.

Meunier Technologies is proud to be collaborating with Veolia Water Technologies Canada Inc. in the INAC (Indian and Northern Affairs Canada) Circuit Rider by supplying its DICE™ chemical dosing equipment to be used by the First Nations operators.

« Meunier Technologies has provided us **accurate and reliable chemical dosing systems in remote locations**. These systems supply potable water to small communities located in British Columbia (Canada). »

Compact System in a Box

« The installations being in remote locations, we were in need for a **compact and reliable solution** that could be **installed directly on site**. Shipping a large traditional chemical dosing system was an inadequate solution for us. Meunier Technologies quickly took charge of us and within days an order was placed and the DICE™ units were on their way. »

Ease of Installation

« Installation was performed without the need of any specific techniques, tools or training. **Within forty five minutes the DICE™ had been installed** and chemical was starting to be introduced in the process. »
